**Application No.:** 10/004,490  
**Office Action Dated:** February 26, 2004

**PATENT**

**Amendments to the Specification:**

Please replace the paragraph beginning at page 15, line 13 with the following amended paragraph:

The architecture of the present invention may include a runtime extension component, ~~such as described in commonly assigned U.S. Patent Appln. No. xx/yyy,zzz, filed Month Day, Year and entitled "Title of the 'zzz Application."~~  
As noted above, the present invention is not limited to Web-based services, but rather the techniques of the present invention can be used in any interactive client-server context wherein a user of the client types in text in connection with a service offered by the server.
